

Coulam et al. (2002)	
Study	1997-2000
Country	USA
Sample size	1,000
Response rate	75%
Study design	Survey
Study population	Adults
Study variables	Dependent variable: β
Independent variables	Age, gender, education, income, health status, etc.
Statistical methods	Regression analysis
Results	$\beta = 0.0001$
Conclusion	There is a positive relationship between age and β .
Limitations	Self-reported data, cross-sectional design.
Strengths	Large sample size, representative of the general population.
